

Game development A3

Game idea: Save Bob

Premise: In this exciting sequel, you take control of Bob. The controls are: left arrow key to move left, right arrow key to move right and space bar to jump. The game takes place in a small area with three platforms, and from either side of the screen objects will spawn and move to the other side at a steady rate. These objects include red triangles, which hurt Bob, golden coins, which increase the score and blue squares which heal Bob. Bob can only take 3 hits of damage, unless he heals with a blue square. The objective is to collect as many gold coins as you can.
